<u>AMENDMENT</u>

Kindly **amend** the application, without prejudice, as follows:

The second secon

In the Claims:

Kindly **add** new claims 10 - 14 as follows:

- 10. A touch input device, comprising:
 a substrate having a first planar surface and a second planar surface;
 an acoustic wave transducer for generating acoustic waves, the
 acoustic wave transducer coupled to the second planar surface such that
 generated acoustic waves are transmitted to the first planar surface;
 planar wiring applied to the second planar surface; and
 means for connecting the planar wiring to the acoustic wave
 transducer.
- 11. A touch input device as recited in Claim 10, wherein the means for connecting the planar wiring to the acoustic wave transducer comprises a discrete connector.
- 12. A touch input device as recited in Claim 10 wherein the planar wiring comprises a composite conductive material.
- 13. A touch input device as recited in Claim 10 wherein the planar wiring is applied by transfer printing.
- 14. A touch input device as recited in Claim 10, further comprising a linear array of acoustically reflective elements on the first planar surface and wherein the planar wiring resides on a portion of the second planar surface substantially opposite to the linear array of acoustically reflective elements.
